

# TZ-BT05B

### --- User Manual v1.4

# **1 Product Overview**

TZ-BT05B is a low power consumption Bluetooth data logger, using the latest Bluetooth 4.0 technology, Nordic NRF51822 chip development and design, It can collect temperature of the surrounding environment and recording and preservation of historical data, can store up to 12000 pieces temperature data, Bluetooth 4.0 can be downloaded over the phone APP configuration tools,to achieve full stage real-time temperature recording. It has the small size, light weight, easy to carry, high accuracy and other characteristics, widely used in various other areas of refrigerated storage and transport, archives, experimental (test) rooms, museums and other temperature testing.

# **2** Applications

- 1. Refrigerated storage and transportation;
- 2. Archives;
- 3. Experimental (test) rooms;
- 4. Workshop;
- 5. Museums;
- 6. Pharmaceutical environment;
- 7. Fresh transport.

# **3 Product Features**

- 1. The high precision and high stability;
- 2. Bluetooth 4.0;
- 3. The long-distance wireless communication;
- 4. External high sensitivity NTC temperature sensor;
- 5. Real-time display temperature;
- 6. Can store 12000 temperature data;
- 7. You can set the alarm temperature range;
- 8. The temperature graph can be automatically generated in the APP;
- 9. Can choose time to query data, the stored data can be saved in history;
- 10. Temperature data can be generate a PDF/CSV report and sent to specified email;
- 11. By pairing Bluetooth printer to print the data report;
- 12. Can by OTA update version.

# **4 Product specification**

Item	Specification		
Frequency signal transmission	2.400 - 2.4835GHz		
Protocol	Bluetooth 4.0		
Modulation	GFSK		
Transmission interval	28		
Internal battery	CR2450,550mAh/3V		
Output power	-4dBm, adjustable		
Maximum transmission distance	e 55 meters (-4dbm)		
Storage	can store 12000 pieces data		
Battery life	1 year (depends on working mode,can replace battery)		
Net weight	25g		
Dimension	50mm*35mm*15mm		
Temperature detecting range	-40°C~+80°C (Just for the temperature sensor)		
Temperature detecting accuracy	$\pm 0.5^{\circ}C(-20^{\circ}C \rightarrow 40^{\circ}C), \pm 1^{\circ}C(\text{Other temperature })$		

# **5** Caution

1, Away from metal objects, not placed in a sealed metal and small space;

2,Note that the distance between the TZ-BT05B and the receiver to ensure the reception accuracy;

3, Away from water and corrosive materials.

# **6** Switch Instructions

Device status	Operation LED light instruction		Instructions
Turn on	Under unopened state, long press button for 3	Flashes continuous 3s on, then flashes once every 10	Data logger starts, start the real-time
	seconds	seconds	temperature record
Turn off	Open state, long press the button for 3 seconds	Flashes 5 times, then off	Close data logger, keep record of temperature data

# 7 APP software

'Temperature data logger' is a free mobile applications which provided by our company to the users, can connect the BT05B through the Bluetooth of the mobile devices and do the settings, data transmission, recording, synchronization, send to email. Apply the Bluetooth BLE way, so you can use Android, IOS phone for temperature monitoring.

#### 7.1 Android phone 'temperature data logger' App use.

Client can download App by scan the QR code below:

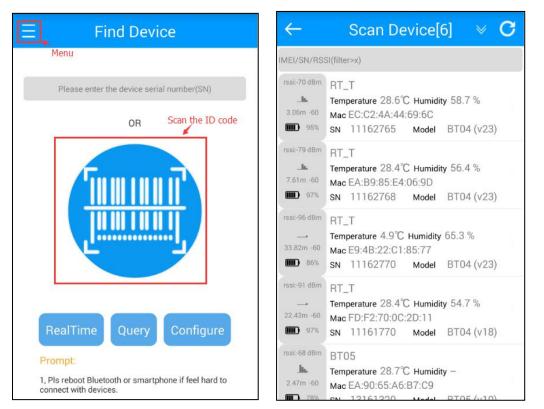

Open the 'Temperature data logger' software, the first to see is the scan code interface; there are three interface buttons, they are 'real time data', 'data extraction',

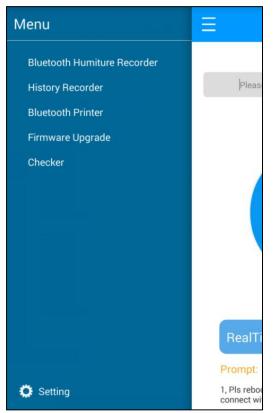

'Configure Devices'; and the upper-left corner of the menu button. Whether you need to enter which interface of this three interface, devices are required SN code, SN code can be scanned, entered directly using the phone keypad, also can directly click Real time/Query/Configure and see the device list:

Note: 1. One mobile phone APP only can scan 300 devices;

2. The mobile phone size must more than 4.7 and the resolution must more than 1280\*720

Press the Menu key to query historical data extraction, pairing a Bluetooth printer, update the firmware by OTA and inspection equipment, as shown below:

Historical records which stores all the history report, you can delete the report when you press the report and hold on for a while.

←	History	~	H	listory

### 7.1.1 Configure logger

After entering the SN code or scanning device, or directly click 'Configure Devices' and select the device, on the home page, or enter the configuration interface, as shown below:

$\leftarrow$	Configure	← Configure
Device Name	BT2703	Storage 60 30 s interval
SN	17062703	
Password	000000	Alarm -20 60 Settings
TX power	-4dBm	Memory Clear OFF
Storage interval	60 30 s	Note Description
Alarm · Settings	-20 60	Save Settings
Memory Clear	OFF	Default Settings
Note		

The interface can be configured BT05B password(6 byte), if the transmit power(-30~4dbm), Normal/Alarm storage space(10~3600s), and the upper and lower temperature limits(-40~80° C), empty stored data .The appropriate value of the transmit power can be selected in the drop-down list; storage interval and alarm settings directly enter numbers according to individual needs; memory is cleared, you can choose to open or close(open will clear historical data). According to individual requirements click Save Settings then can write in, if save successfully, will be prompted the 'Save Configuration successful.'the'Default Setting'button will reset the device to default.

#### 7.1.2 Real time data

'Real time data' displays the device name, real-time temperature and power, the interface for viewing real-time temperature, if the temperature exceed the limits then the figure change to be red, or else black font, this interface does not provide editing function . As shown below:

#### 7.1.3 Query data

'Query Data' screen, can choose extraction time, displays SN code, Storage interval, Alarm settings, the total number of data recorded , the maximum/minimum/ Avg/MKT temperature during recording, start time, end time, total time, temperature graph and Bluetooth printing, the interface is mainly used for reading temperature data recorded in a specific time period, the same as the historical record, the report includes data report, data record, temperature chart, set report, send report and print report, As shown below:

← Data Records		<b>O</b> (	Data Records
